PROFESSIONAL EXPERIENCE:

Blue Horseshoe, Part of Accenture

Columbus OH

Senior Technical Consultant

June 2019 - Current

- Technical Lead on \$3.9 million software implementation project, Blue Horseshoe's 3rd largest project in 2021
- Recognized as 6th highest billable resource for consulting services (97% utilization vs company average 70% utilization)
- Lead daily calls with diverse group of stakeholders, including client's IT leadership and subject matter experts, to review development cycle
- Directly oversee eight Jr./Sr. developers and delegate assignments through Azure DevOps
 - Translate operational needs to technical requirements and craft technical design documents (120+ to date)
 - Establish technical time estimates for software modifications and ensure they align with project timeline
 - Host weekly standup with development team and communicate progress to necessary parties
- Deploy and maintain multiple environments, including developer cloud virtual machines (VM), quality assurance VMs, and sandbox environments
 - Perform code merges and package deployments through automated Azure DevOps pipelines for multiple branches
 - Troubleshoot reported bugs and performance issues through SQL database and debugger tools
- Serve as Lead Integration Developer, designing SSIS integrations between the cloud application and on-premise SQL Server using OData and custom service APIs
- Provide mentorship to peers and junior developers
 - Teach coding best practices at boot camp for new hires (2018 - Present)
 - Designated as internal expert in integration strategies and provide insights for new projects, as needed

Technical Consultant

May 2017 – May 2019

- Lead Integration Developer on the software implementation for a government entity (State Department of Liquor Control)
 - Winner of Blue Horseshoe's *Project of the Year 2018*
- Designed high-volume integrations with client's existing software applications
 - Used OData technology and created Swagger specifications for our partners to consume in their applications
 - Traveled on-site for software Go Live to troubleshoot technical issues with end-users
- Wrote modifications in Microsoft object-oriented programming language, focused on best practices and performant code
- Engaged in teams of 8-10 professional consultants providing daily updates to my technical leads and project managers
- Founding member of Blue Horseshoe's integration focus group, assisting projects with their integration needs

Nationwide Insurance

Columbus OH

IT Application Developer (Internship)

May 2016 – August 2016

- Corrected defects and created enhancements for internal full stack application using Java, JSP, JavaScript and SQL
- Participated in daily SCRUM standups with my application team to review the sprint and progress of each team member
- Developed application in 24-hour Hackathon to create new internal software using sponsored Microsoft technologies
- Joined ten-person intern team organizing events for the summer's 200+ interns
